b). ? 10
5. a) Explain virtualization? Why it is important in Cloud computing? Mention some points? 8
b). Write about Service Level Agreement and its types in cloud computing? 7
6. a) List out the dimensions of Cloud Security and explain them? 8
b). How can we achieve security in cloud computing? 7
7. Write short notes on [Any Two] 10
 - a). Containers
 - b). Load Balancing
 - c). Multihoming

Madan Bhandari College of Engineering

Semester: Fall

Year : 2025

Level: Bachelor

Full Marks: 100

Programme: B.E (Computer)

Pass Marks: 45

Course: Cloud Computing and Virtualization (CMP424)

Time: 3 hrs.

Subject: - Cloud Computing and Virtualization (Set B)

Candidates are required to give their answers in their own words as far as possible.

Attempt all questions

- 1 a). Define Cloud Computing and explain its working mechanism? 7.
b). List all the Cloud Computing deployment models and explain them? 8.
2. a). What are the types of Cloud Computing services explain any three of them? 8.
b). List the benefits and properties of Cloud Computing? 7.
3. a). What are containers? Write short notes on Containers? 7
b). List the top three Cloud Computing service providers? Explain any two in details? 8
4. a). Write a history about cloud computing? How it was started? 8
b). Mention some of the technology that helps cloud to evolve rapidly and explain any two of them. 7
5. a) Explain virtualization? Why it is important in Cloud computing? Mention some points? 8
b). Mention advantages and disadvantages of Cloud computing in your own points? 7
6. a). Draw the architecture of cloud computing and explain it? 8
b). Write about security in cloud computing in your own points? 7
7. Write short notes on [Any Two] 10
 - a). Hypervisor
 - b). Block-chain
 - c). Virtual Machines
